Masterpiece

Rather than simply making products, we strive to create 'Great Product' for our customer

Research & Development

Research and development-oriented OEM and ODM company

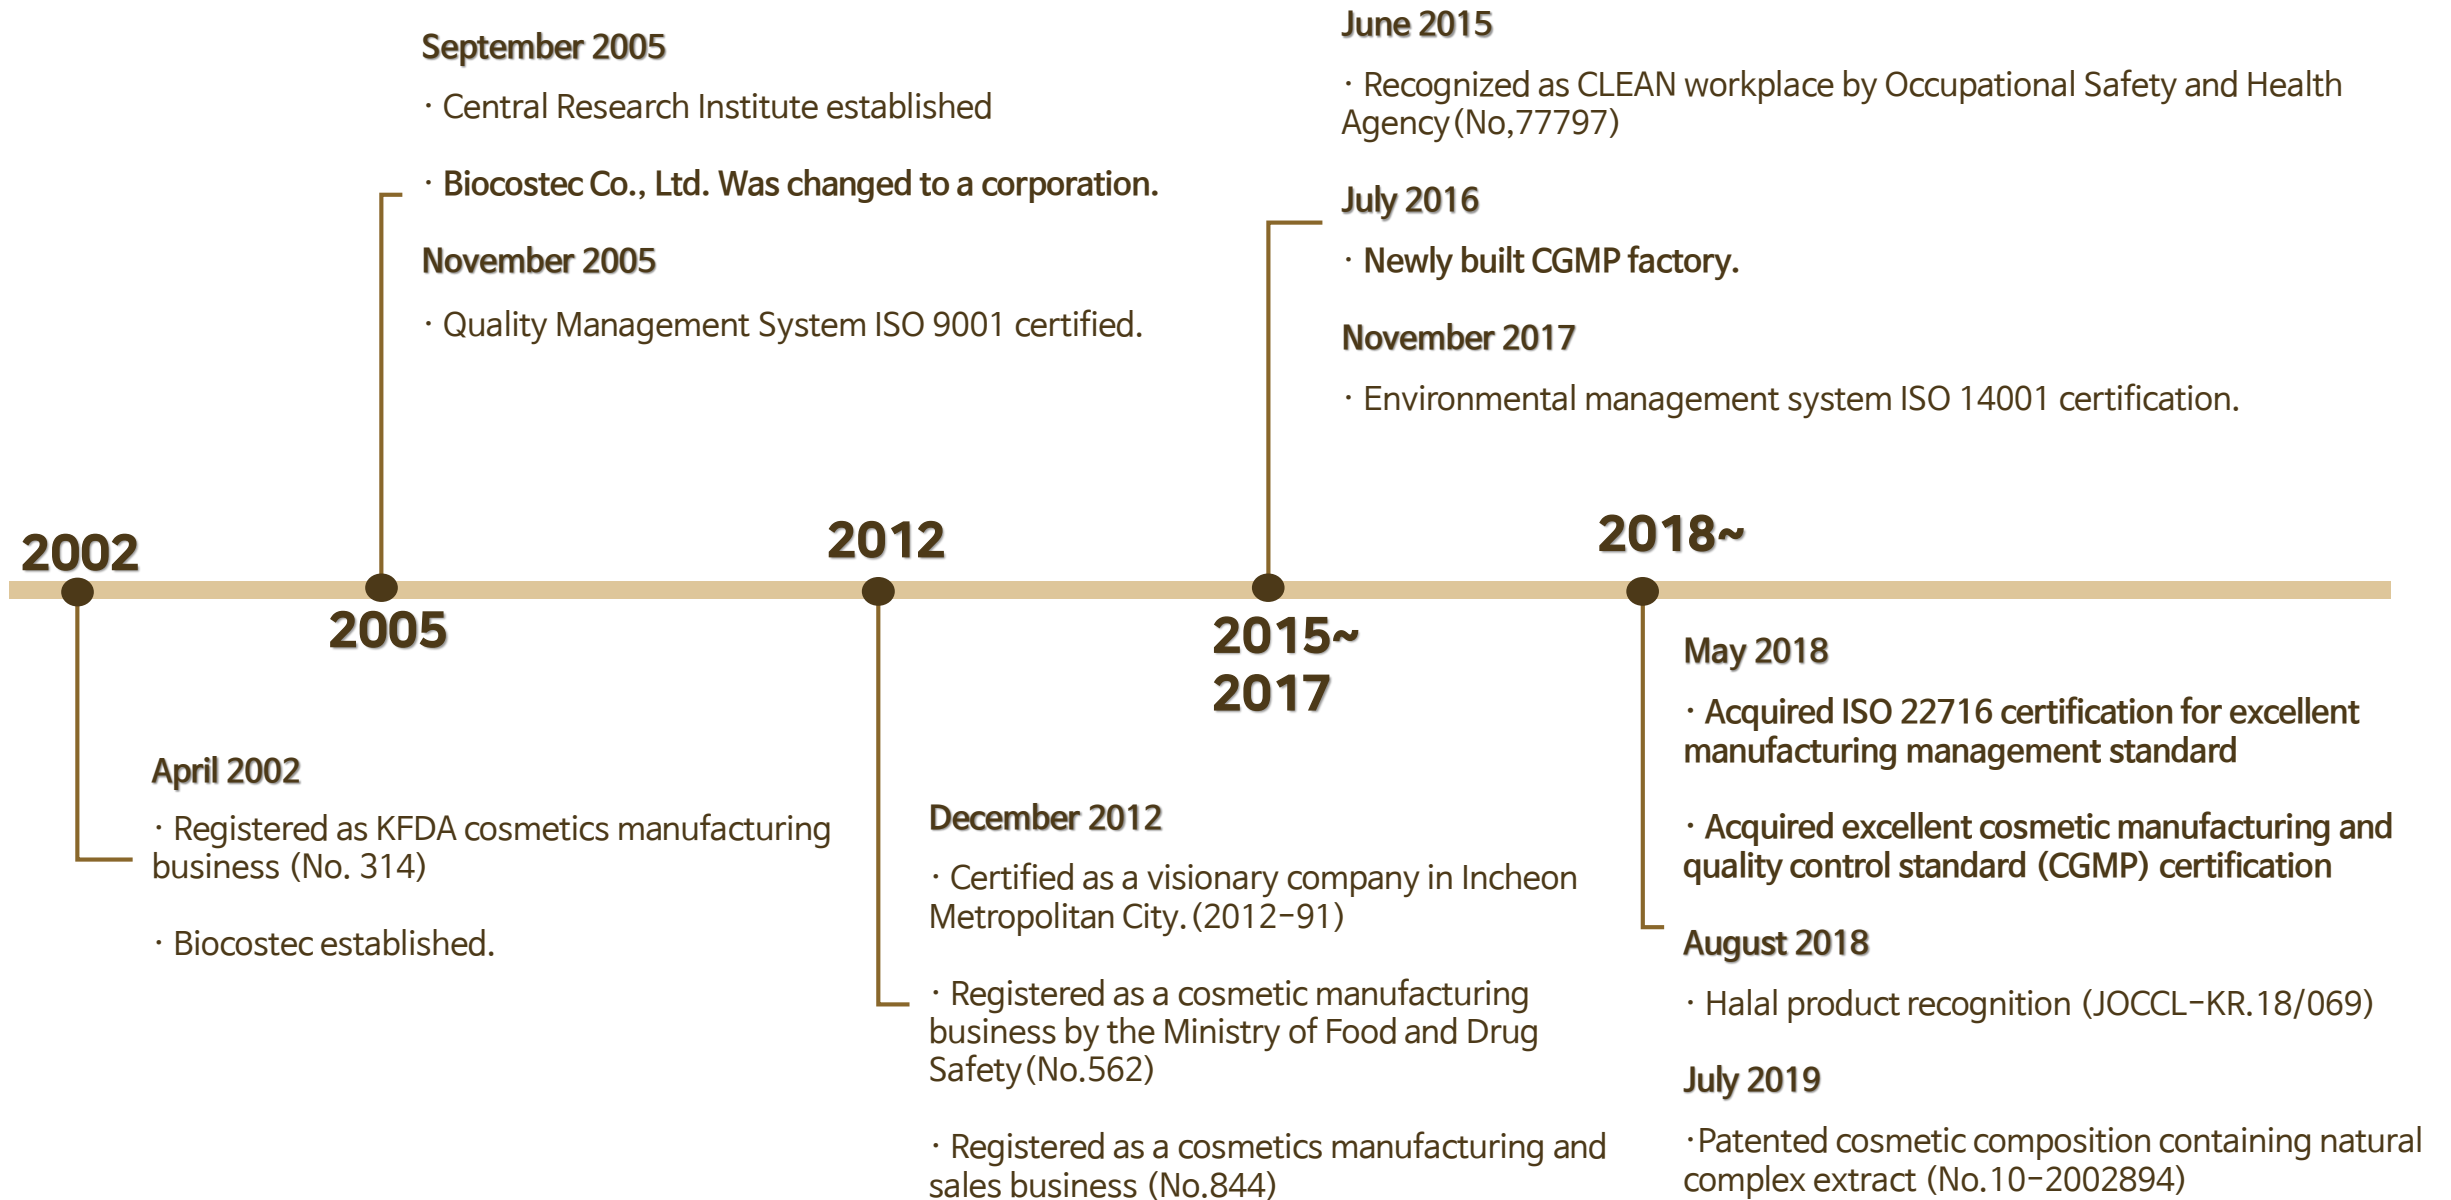

OEM&ODM

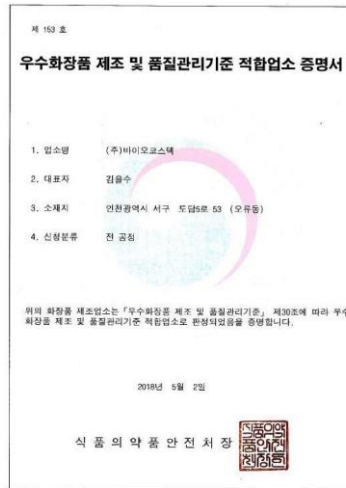

Improve our customer satisfaction by producing products that work for our customers

**“ Rather than simply making products, we strive to create ‘Great Product’
for our customers”**

Biocostec Co., Ltd., established in 2002, is a company specializing in cosmetics OEM and ODM, and is growing with corporate philosophy, “Rather than simply making products, we strive to create ‘Great Product’ for our customers”. We are developing functional cosmetics and cosmetics made with natural ingredients, and we are striving to make them the best possible quality through endless research. From that we will improve our customer satisfaction by producing products that work for our customers.

Central Research Institute

Chemical Lab

Microorganism Lab.

Production Infrastructure

Biocostec Co., Ltd. Acquired CGMP(Excellent Cosmetic Manufacturing Standards and Quality Control Standard), ISO 22716, and now produces excellent products through advanced production automation system and strict quality control system.

Purified Water System

Reverse Osmosis Ro and Electro Deionized System combine to produce purified water close to ultrapure water.

RWS (Raw material Weighing System)

All processes from raw material reception to weighing and manufacturing are automatically recorded and managed by Raw Material Weighing System. Through this, we are making efforts to reduce defects by strengthening traceability of manufacturing records such as increasing productivity of products and preventing incorrect input of weighing raw materials.

WMS(Warehouse Management System)

Enterprise Resource Planning(ERP) is used to automatically process logistics data from warehouse such as inventory management, delivery management, and logistics management.
